no

No

It made communication with classmates and project team very easy. Also I can interact with professors and receive classroom updates easily.

some

social media serves as distraction. Algorithms of such sites don't promote study pages as they want higher retention times. Leading to bad results and time drain

Lots of video lectures on youtube to guide me through academic courses and lots of prep content for exam purpose also which proves quite helpful during exams.

Let's say, I haven't understood a concept, or the way my faculty taught, didn't suits me at some point, I switch to YouTube for better explanation.

Thanks a Ton
